

## CCIS 2021 Webinar Series: Ecological Impacts & Climate Intervention Strategies

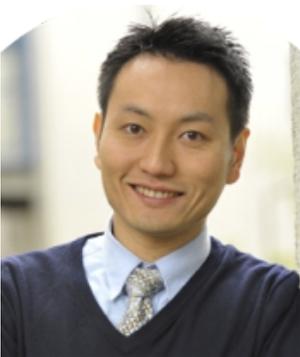

### Sarah Weiskopf

Sarah Weiskopf is a biologist with the [National Climate Adaptation Science Center](#). Her research focuses on the impacts of climate change on terrestrial wildlife. Sarah joined the USGS in 2016 as a Presidential Management Fellow, where she has served as a chapter lead on the Ecosystems, Biodiversity, and Ecosystems Services chapter of the Fourth National Climate Assessment, and as a U.S. Delegate to the Intergovernmental Platform on Biodiversity and Ecosystem Services. During her fellowship, she also spent several months working on international biodiversity issues at the Department of State Office of Conservation and Water.

### Phoebe Zarnetske

Phoebe Zarnetske is a community ecologist in the [Department of Integrative Biology at Michigan State University](#), and initiated the Spatial Ecology Graduate Certificate Program. Her research connects observed patterns of biodiversity and community composition with underlying mechanisms, specifically how the composition and geographic distribution of species and ecological communities are affected by biotic interactions, species invasions, biophysical feedbacks, geodiversity, climate change, land use change, and geoenvironment. A central goal of her research program is to understand which species and ecological communities are most sensitive and/or resilient to climate change.

### William Cheung

William Cheung is a Professor and Director of the [Institute for the Oceans and Fisheries](#), University of British Columbia (UBC). His main research areas include understanding the responses and vulnerabilities of marine ecosystems and fisheries to global change, and examining trade-offs in managing and conserving living marine resources. He was a Lead Author in the IPCC Working Group II of the Fifth Assessment Report, and a Coordinating Lead Author of the Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES) and Global Biodiversity Outlook.

Anton Seimon will serve as Moderator.

**Join us online 28 July 2021 at 9–10:30 AM MDT (GMT-6)**
